

MY TOP DINOSAUR

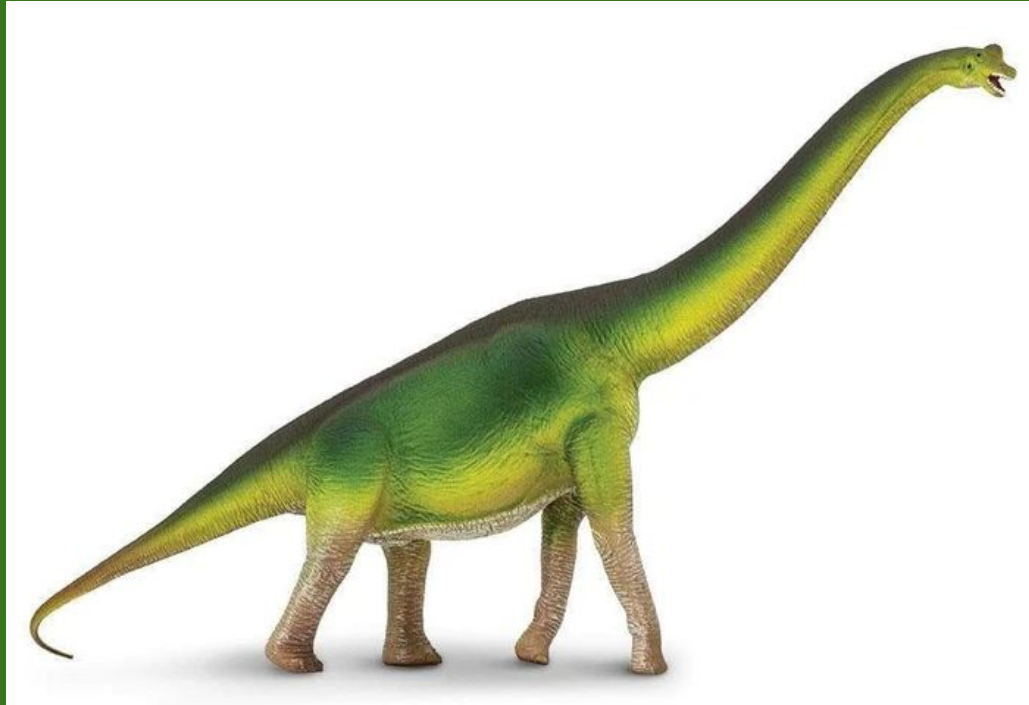

BY ROSIE

The Name Of My Number 1 Dinosaur:

Brachiosaurus

What it looked like:

The Brachiosaurus was a big and tall dinosaur. It has a 9 metre long neck. They have relatively long tails. The skin of the Brachiosaurus is green and this helps it blend into the vegetation.

What Type Of land Does the Brachiosaurus Live In.

It lived in what is now North America and what is now Africa. The type of land that it like to live was in flat plains that fet an equal amount of water and rain. First fossil of Brachiosaurus was found in Grand River Valley in Colorado in 1900.

What does the Brachiosaurus eat:

The brachiosaurus was a herbivore and mainly ate a plant called Ginko.

Extra Info:

- The Brachiosaurus is a type of dinosaur known as a Sauropod, they are famous for reaching incredible sizes. Other members of the Sauropod family include the Diplodocus and Apatosaurus.
- The name Brachiosaurus comes from Greek words meaning 'arm' and 'lizard'. The name refers to the interesting nature of Brachiosaurus legs which were longer at the front than the back.

A DINOSAUR JOKE:

Q: What do you get when a dinosaur scores a touchdown?

A: A dino-score
