

The background of the image is white with a dense, scattered pattern of small, colorful confetti pieces. The confetti consists of short, thin rectangular dashes in various colors including red, blue, green, yellow, orange, and grey.

Welcome 6R

Let's get to know one another...

This game is where you state two truths about yourself and one lie.

The chosen person must state 3 facts. Two of these must be true... and one a **BIG FAT LIE!**

Everyone else needs to listen carefully and say which one they think is a lie and which two are true.

Skitt – tell us
about yourself

Instructions

Pass around the bag of skittles and take
ONLY two.

The chart to the right shows what question each colour Skittle has. Going around the classroom you need to pick out of the two Skittles you have what question you will answer and share this with everyone.

If anyone has two of the same colour Skittle then you have the chance to trade with another student.

Skit – tell Us

RED – something fun you did this summer.

Orange – about someplace cool you visited.

Yellow – about something you tried for the first time.

Green – about your favourite things to do.

Purple – something no one knows about you.

Time for a game...

One student will be selected to go outside to the hallway and wait there, while one student inside the classroom will hide an object somewhere.

The student outside the classroom will then come back in and will need to search for the missing object.

The students inside the classroom will yell hot, warmer, or cold depending on how close they are to the missing object.

Hopefully, everyone has learnt some fun facts about one another and have enjoyed themselves.
